Expected Cutoff Marks for ESE 2017

Dear Students,

We have analysed both the papers of ESE 2017 (Prelims) in all four branch and we have taken in considerations the standard of question in both paper and also the previous trends and pattern of 2015 and 2016 written and final results. It is important to observe the pattern of cutoff for interview call and for final selections.

The branch-wise details of cutoff for year 2015 and 2016 are as follows:

| Stream | Written Cutoff (in %) | | Final Cutoff (in %) | |
|--------|-----------------------|------|---------------------|------|
| | 2015 | 2016 | 2015 | 2016 |
| CE | 51.6 | 46.4 | 56.2 | 51.9 |
| ME | 48.2 | 52.9 | 53.3 | 57.2 |
| EE | 52.1 | 54.1 | 55.2 | 57.8 |
| E&T | 55.8 | 54.5 | 58.3 | 57.7 |

Based on above observations cutoff is higher (in %), whereas in written exam cutoff is relatively lower nearly by 3 to 5%, because the number of students called for interview are approximately 3 times than the number of students finally selected.

Since in ESE 2017 (Prelims) about 7 times number of students will qualify for mains stage therefore as per previous trends the cutoff will further lower by about 3-5% than what it was in written stage in previous years.

We have also taken in considerations the opinion of all expert faculties the of MADE EASY, feedback of students after appearing in exam, the level of questions asked in ESE 2017. Based on above fact MADE EASY Team has projected it's opinion about expected cutoff range required to qualify in ESE 2017 (Prelims) are as follows:

| Stream | Gen | OBC | SC | ST |
|--------|---------|---------|---------|---------|
| CE | 210-220 | 200-210 | 180-190 | 180-190 |
| ME | 220-230 | 205-215 | 180-190 | 180-190 |
| EE | 220-230 | 205-215 | 180-190 | 180-190 |
| E&T | 225-235 | 210-220 | 190-200 | 190-200 |

Best wishes to All ESE 2017 aspirants

From MADE EASY Teams
